

**ETECHCONSULTINGLLC**

Etech Consulting Devops Master Class

+1 3478735512/+1 6677868741

GIT-Module

**Group level project:**

1. Export a csv format document showing all the user member of your private organization in github.
2. Write the steps you will take to contribute to a project in your company
3. Create a repository in your private organization and move “N” shell script to that repository where N is the number of group members. Note each member will create a script with their name \$yourname.sh and enter codes to do system analysis .
  - Assigned your reviews to etechDevops or Eng Rudolph
4. Each member of the group should clone their organization/repository and transfer the content into their private repository then send us a screenshot to the regular submission emails.

“Thanks for choosing Etech Consulting for your Devops Training”
